## **Parking Correctly**

The Sun Link system is a fixed loop route -- when one streetcar is blocked and stopped, then all other Sun Link streetcars on the route must stop. If not properly parked, your vehicle will block the streetcar from moving.

When parking on the street adjacent to streetcar tracks, all parts of your vehicle – including vehicle mirrors — must be within the marked white lines of the parking space.

After you park in a street spot parallel to the tracks, exit, pause and check to ensure your vehicle is parked within the white lines.

Park incorrectly and your vehicle will be towed to an impound lot. You will have to pay a \$188 fine, towing costs and impound fees.
